

To reinforce the safety leadership skills taught in the FSL course, you can revisit the scenarios with your crew or you can use this template to create your own. It will work best if the scenario you create is based on a safety situation you, or you and your crew, have experienced. We suggest that you make up names rather than using those of your crew members.

Fall situation, Caught between, Confined space, Faulty equipment, Poor housekeeping, Struck-by an object, Trench collapse, weather condition, Other

Residential, Commercial, Mixed-use, Heavy Highway, Bridge, Other

- Imagine how the scene would play out differently, including better safety outcomes and improved safety climate, had one or more of the safety leadership skills been used.

A large, empty rectangular box with a black border, intended for writing a new scenario based on the prompt above.

After you complete the new scenario you can go over it with your foremen or lead workers during meetings or as part of a tool box talk.
