

Lead Exposure

Remember This

- ¾ OSHA requires employers to protect you from lead by providing you with training, the right tools, and personal protective equipment. If you work around high levels of lead, they must also have your blood tested for lead.
- ¾ Never blast, sand, or cut with a torch any surfaces th

liver, and other parts of the body .

Diego's

What could have been done to prevent exposure to lead while working?

- # Have you ever had any of the same symptoms during a job?
- # If so, did a doctor check your blood for lead?

Lead Exposure

- # Never blast, sand, or cut with a torch any surfaces that may contain lead until it has been tested for lead.
- # Wash your hands and face before eating, drinking, or using tobacco.
- # Do not eat, drink, or use tobacco products in the work area.
- # i
